B E A U T Y

LEONARDO

wellness unit

Wellness console with one or two basins, with curved doors and extractable basket drawers. Structure in wood consisting of an under-top profile and a supporting vertical element covered in polished curved stainless steel. Curved doors and sides engraved with "cannetté" motif in low relief. Available lacquered with RAL colours or with metal anthracite or metal pink gold finishes. Top in shaped marble with bevelled profile. Taps and faucet in chromed solid brass. Internally finished with mat lacquering. Metal parts can be finished with any of the lacquer included in the Visionnaire selection of metal finishes. Top available in wood veneers with "azerocare" anti-stain treatment.

Azerocare is the first specific protective process for marble and is the ideal solution for bathroom and kitchen spaces as it guarantees permanent protection against stains and corrosion caused by contact of surfaces with acidic organic substances (whose PH ranges from 3 to 8). This process carries out its protective function, keeping aesthetics, colors and perception to the touch of the natural stone.

Azerocare is therefore a guarantee against possible damages deriving from the use of products such as wine, coffee, oil, vinegar, tomato sauce, fruit juices, as well as perfumes, toothpastes, detergents, lotions, lipsticks or eau de toilette. This process also makes surfaces non-permeable, avoiding the proliferation of bacteria. This treatment is available on the Black&Gold, Dover White and Dalmata marbles for the products Kerwan dining table, Kobol wellness unit and Leonardo wellness unit.
